How It Works

01

Upload Input Sheet

Sales team uploads raw Excel/CSV file with company names and required designations

02

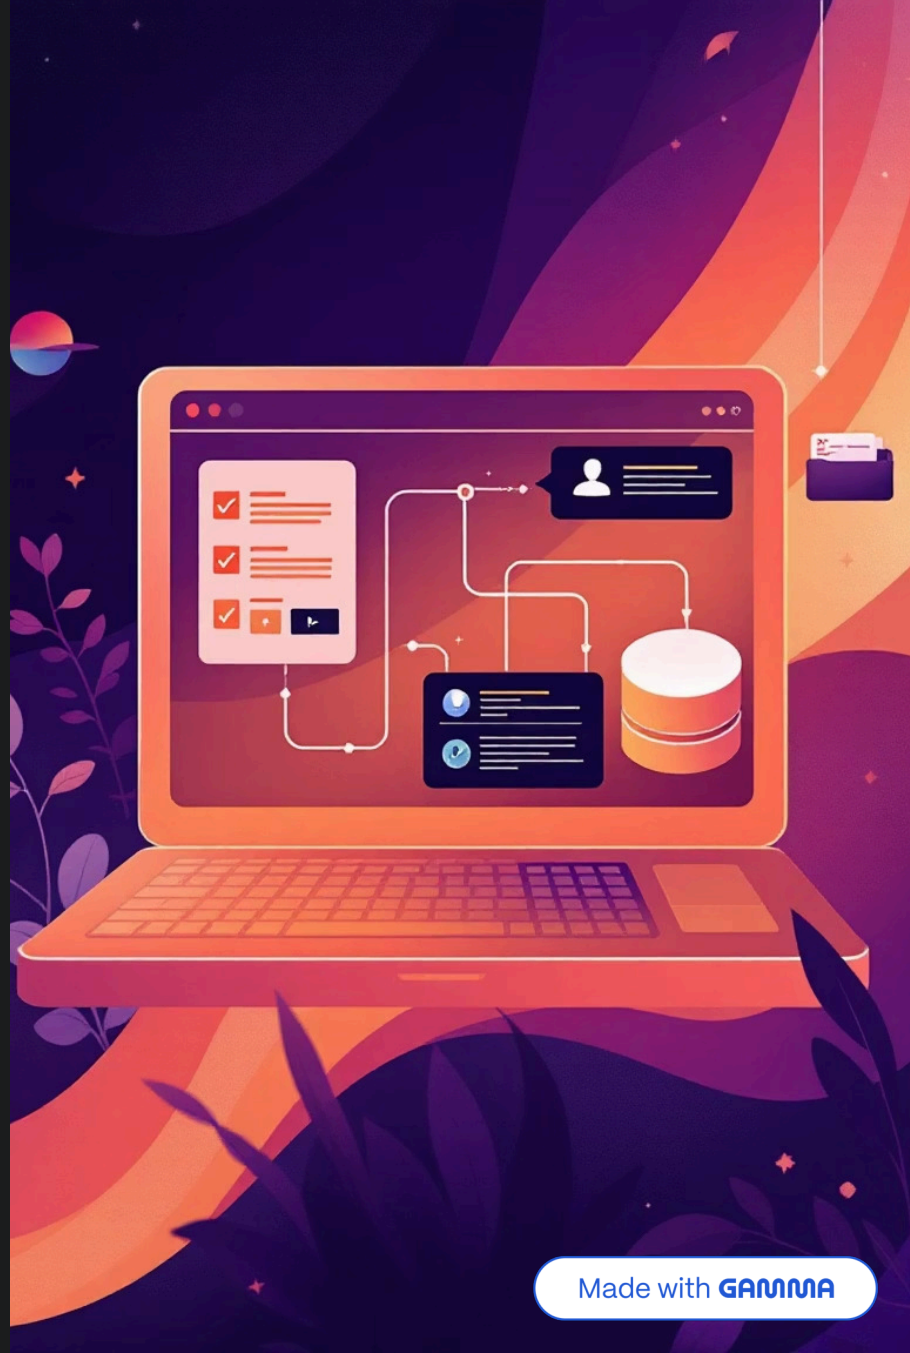
Company Search & Enrichment

Agent normalizes company names and finds best match by domain, size, and industry

03

People Search

Runs Apollo people search, strictly filtered by provided designations



Made with GAMMA

Precision & Delivery

Accuracy Filters

Deduplication, fuzzy matching, and first-word normalization ensure only correct companies and contacts pass through

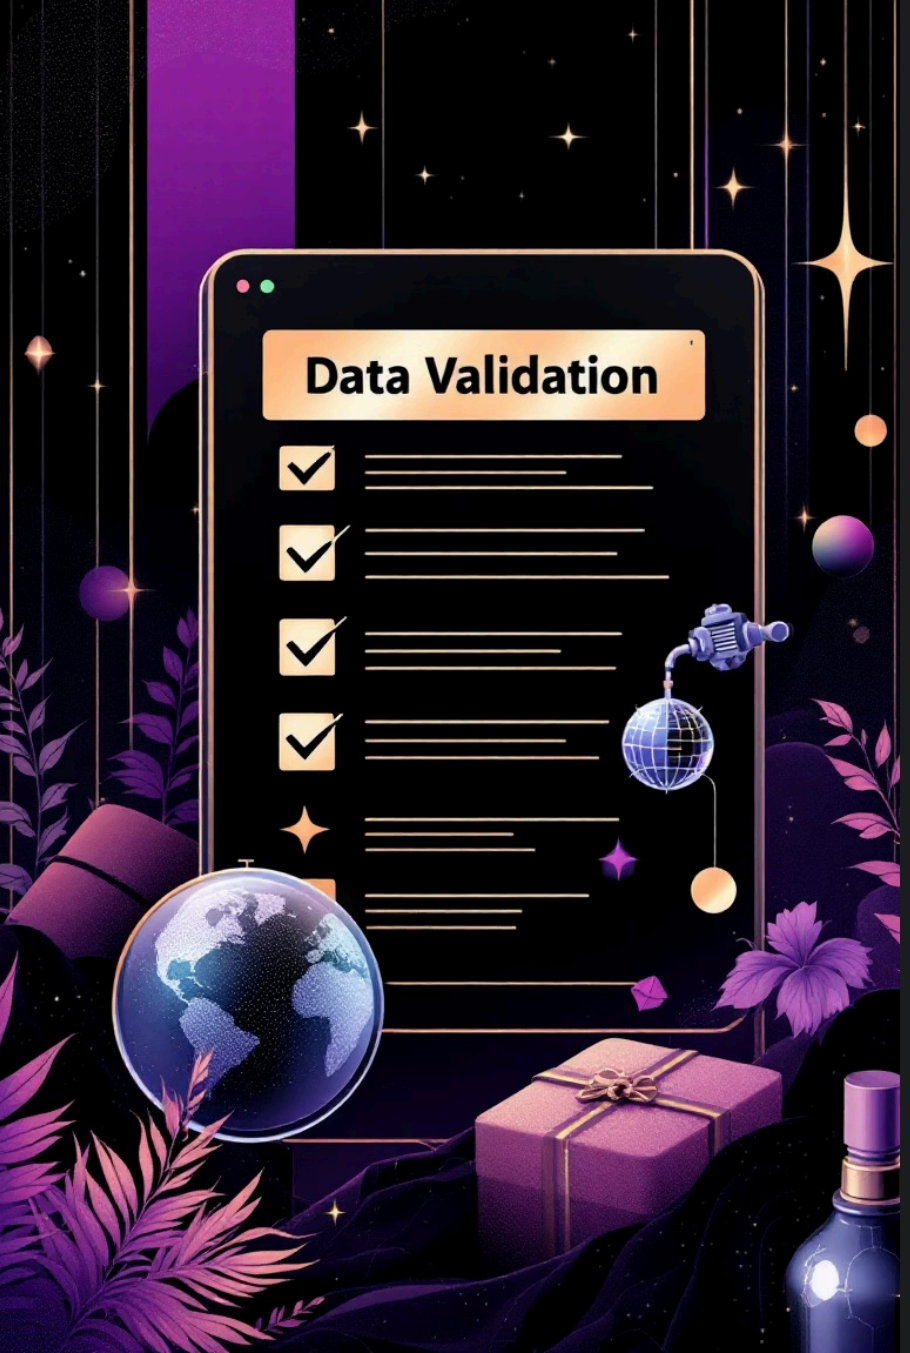
Auto Write to Sheets

Company info and employee details mapped into structured Google Sheets automatically

Final Delivery

Enriched Excel file emailed back to user, ready for sales outreach

Made with GAMMA



Multi-Layer Accuracy System

Normalization & Deduplication

Removes suffixes like Ltd, Pvt, Inc before matching. Picks best match by employee size and domain consistency.

Company Validation

Trims to first 2 words for fallback search. Ensures candidates start with original prefix to avoid false hits.

Made with GAMMA

Designation-Based Precision

Exact Title Matching

Only returns people whose titles exactly match provided designations like CIO or HR Head

Rejects Near-Matches

Filters out irrelevant roles to maintain data quality and relevance

Apollo Integration

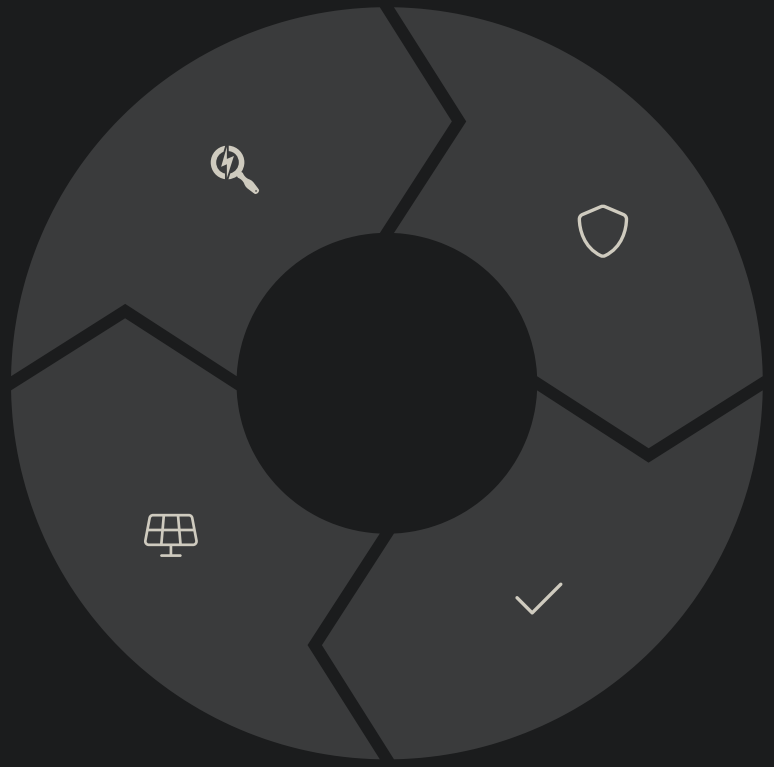
Uses Apollo's people unlock for verified emails and LinkedIn profiles

Made with GAMMA

Quality Assurance Process

Layered Enrichment

Multiple data sources for comprehensive profiles



Error Handling

Prevents blank or duplicate results

Clean Data Guarantee

Every row has verified Company + Person data

Output Validation

Deduplicates on Email/LinkedIn before delivery
